PROFILE

Full-stack engineer with 4+ years of experience building enterprise web applications with Angular and Node.js/Express (ERP/CRM platform used by 200+ employees), plus Java Spring Boot REST APIs on an end-of-studies project. Currently building core modules of an accounting SaaS used by 30,000+ users. Strong in REST API integration and secure authentication (JWT, OAuth 2.0 / OpenID Connect, role-based access control), with domain expertise in accounting, invoicing and electronic invoicing (Factur-X). Works in Agile teams with CI/CD pipelines (Azure DevOps).

EXPERIENCES

Nov. 2024 – Present
Rabat, Morocco

Software Engineer (Front-End / Angular) — Hubbix Comptabilité SaaS (Full Time / Hybrid)
Matys by Cegid

Development of accounting web applications used by 30,000+ users:

- Build and maintain an enterprise accounting web app in **Angular 17** / **TypeScript** within an **Nx monorepo** (modular shell-feature-data access architecture).
- Develop reactive UIs with **Angular Signals**, **NG-ZORRO** (Ant Design), and OnPush change detection.
- Integrate secure **REST APIs** in a **multi-tenant** setup (**OAuth 2.0** / **OpenID** Connect).
- Build core accounting modules: entry screens, invoice handling, and totals calculation (net, VAT, and advance payments).
- Implement the onboarding flow for connecting to certified e-invoicing platforms.

Technologies: Angular 17, NX, Micro-frontends, NgRx, RxJS, NG-ZORRO, TypeScript, Azure DevOps, Agile Methodology

Dec. 2022 – Aug. 2024
Tangier, Morocco

Full-Stack Developer (MEAN Stack), ERP for U.S. Government Contracting
Sanford Federal, Inc

Creation, maintenance, and deployment of ERP/CRM system:

- Developed and scaled a B2B CRM/ERP platform used by 200+ employees, covering the full federal contract lifecycle from opportunity tracking and proposals to contracts and finance. It cut manual Excel-based work by 90%.
- Automated business workflows (approvals, reminders, cron jobs, real-time notifications), saving more than 30 hours of manual work per week.
- Built REST APIs with Node.js, Express, MongoDB, and Angular features (dynamic tables, dashboards, and Excel/PDF exports) across 30+ business modules.
- Integrated QuickBooks Online, Azure Blob Storage, Microsoft Graph, and the SAM.gov API.
- Secured the platform with JWT, email OTP, two-factor authentication, and role-based access control (20+ roles).

Technologies:

- **Frontend**: Angular 13, TypeScript, RxJS, Angular Material, Bootstrap 5, ng-bootstrap, Highcharts, Chart.js, ApexCharts, D3.js, ExcelJS, jsPDF, PWA (Service Worker)
- **Backend**: Node.js, Express.js, REST APIs, Joi, JWT, bcrypt, Multer, Socket.IO, node-cron, Web Push, Nodemailer
- **Database**: MongoDB, Mongoose (aggregation pipelines)
- **Cloud and integrations**: Azure Blob Storage, Microsoft Graph / MSAL (OAuth 2.0), QuickBooks Online API (Intuit OAuth), SAM.gov API
- **Tools**: Git/GitHub, npm, nodemon, Karma/Jasmine, Postman, VS Code

Sep. 2022 – Dec. 2022
Technopark Tangier, Morocco

Full Stack Developer (Internship)
Sendatrack

Development of a B2B Fleet Management & Real-Time Tracking Platform:

- Engineered interactive and real-time mapping features for a fleet management dashboard utilizing **Angular 13** and **Leaflet**.
- Integrated secure **Laravel REST APIs** to process, synchronize, and display vehicle telemetry data seamlessly.
- Collaborated on the functional system design and resolved complex data-synchronization bugs, significantly enhancing platform stability and user experience.

Technologies: Angular 13, Angular Material UI, TypeScript, Leaflet, Bootstrap, Laravel (REST API), Agile Methodology

Mar. 2022 – Sep. 2022 Software Engineer — Web & Mobile | API & Authentication Integration. (End of Studies Internship)
Tangier, Morocco PREMO Mediterranean

Analysis, Creation, and Deployment of a Digitalization System for Production Processes:

- Built a full-stack web platform with Spring Boot (REST APIs, MongoDB) and Angular, including statistical calculations and data visualizations with PrimeNG.
- Developed a native Android app (Java, MVVM with ViewModel/LiveData, Retrofit) for production team leads to declare working hours, output, and scrap per fabrication order.
- Analyzed requirements and designed the system architecture using UML
- Built the core screens: dashboard, hours and presence declarations with history, employee and production-line search/selection, group management, and production statistics.
- Analyzed functional and non-functional requirements and designed system architecture using UML.
- Configured a web server and deployed the system on a local server using **Windows Server**, an **Ubuntu** virtual machine, and **Apache Tomcat.**

Technologies: Angular 13, PrimeNG UI, Bootstrap, TypeScript, Java, Spring (boot, security, data, MVC), Maven, MongoDB Atlas, MongoDB Compass, Git, GitHub, Android SDK (Java), Android Studio, Gradle, MVVM (ViewModel, LiveData, Navigation, Data Binding), Retrofit, OkHttp.

Aug. 2021 –Jan. 2022 Full-Stack Web Developer — IDMAJ Community Portal (Internship)
Tangier, Morocco SMART AUTOMATION TECHNOLOGIES

Development of a multi-service Institutional web platform (Employment & Social Services):

- Built a high-performance **SPA** using **Angular 11** with Angular Universal (**SSR**) for improved **SEO** and faster load times, featuring interactive maps (**Leaflet** / **OpenLayers**) and responsive **Angular Material** interfaces.
- Created a secure **REST API** with **Node.js** / Express and **MongoDB** (Mongoose), handling **JWT** authentication, file uploads (**Multer**), and automated email delivery (**Nodemailer**).
- Implemented 40+ business modules (job offers, candidates, employers, forum, surveys, and e-counter) following a decoupled, maintainable MVC architecture.

Technologies: Angular 11, Angular Material, TypeScript, JavaScript, Leaflet, Atlas, ExpressJS, Node.js, UML, MongoDB, Mongoose, REST API, Git, JWT, Agile Methodology

EDUCATION

Jul 2022 **Master's Degree In Computer And Mobile Systems**
Tangier, Morocco Faculty of Sciences and Techniques of Tangier

Jul 2020 **Bachelor's Degree In Computer Engineering**
Tangier, Morocco Faculty of Sciences and Techniques of Tangier

Jul 2015 **High School Degree In mathematical sciences**
Tangier, Morocco Abdelkhalek Torres High School

SKILLS

Technical Skills

- Front-End & Modern Architecture: Angular (v11-19), TypeScript, JavaScript, RxJS, NgRx, Micro-frontends (Nx), NG-ZORRO, PrimeNG, HTML5/CSS3, Bootstrap.
- Back-End & Microservices: Java Spring (Boot, Security, Data, MVC), JEE, Node.js, Express.js, REST APIs.
- Mobile: Android (Java, Android Studio, Gradle), MVVM with Jetpack components (ViewModel, LiveData, Navigation, Data Binding), Retrofit; Flutter (Dart)
- Databases: MongoDB (Atlas/Compass), PostgreSQL, SQL Server, MySQL.
- Cloud, DevOps & Tools: Microsoft Azure, Azure DevOps, Git, GitHub, CI/CD pipelines, Docker, Agile/Scrum, UML.

Soft Skills

Problem-solving, team collaboration, critical thinking, time management, adaptability, attention to detail, initiative, creativity, organization, and negotiation.
